TO: Daniel Holland, Chair, Academic Senate
FROM: Mark Temple, Chair, University Curriculum Committee ^{MAT}
RE: Proposal for Deletion of the Department of Technology Construction
Management Sequence

The University Curriculum Committee has approved and is forwarding for Academic Senate review the attached Department of Technology proposal to delete the Construction Management Sequence from the Major in Industrial Technology.

The Department of Technology proposes deletion of the Construction Management Sequence that is currently under the Major in Industrial Technology and has replaced it with the new Major in Construction Management that was approved in 2010. Technology did not request deletion of the sequence at the time they proposed the new major and this is now being done to clean up the catalog and work with the Registrar to disestablish sequences that have already become major technology programs.

The Department indicates that students in the current sequence, under earlier catalogs, will still have access to all courses necessary for them to complete the sequence.

If approved by the Academic Senate the sequence will be removed from the *2014-2016 Undergraduate Catalog*.
